Lone Mountain Contracting, Inc. Wins Award

from American Sports Builders Association for Local Projects

Ellicott City, MD – Several projects built by Lone Mountain Contracting, Inc., (LMC) located in Bosque Farms, NM have been recognized as winners in the American Sports Builders Association's (ASBA) annual awards program. ASBA, of which LMC is a member, is the national organization for builders, designers and suppliers of materials for athletic facilities. Awards are presented each year to facilities built by ASBA members, which best exemplify construction excellence. The award-winning projects built by LMC are the Taos Alexander Gusdorf Eco Park, Questa High School Multi Field Facility, and the Taos High School Multi Field Facility.

Presentation of awards was made at the ASBA Technical Meeting, recently held in Palm Desert, California. A panel of ASBA members judged entries anonymously. Projects were scored individually based on considerations such as layout and design, site work, drainage, base construction, surface, amenities, innovation and overall impression. Winning entries were those whose cumulative scores meet or exceed the standard.

LMC was presented with an award in the distinguished sports field category for its work on the Eco Park and in the distinguished multi-purpose field category for its work on the Questa High School multi-purpose field. Alexander Gusdorf Eco Park also received the Green Facility of the Year Award for 2011.

The Alexander Gusdorf Eco Park is the highest altitude FIFA 2-Star training facility in the world. This outstanding facility will not only be utilized by the local community and NM residents, but will also draw professional and international soccer teams for training in high altitude environments.

Questa High Sports Facility is a multiuse facility incorporating synthetic turf for football, soccer, and baseball, as well as a polyurethane synthetic track. These eco friendly fields will require minimum maintenance and are useable year round. Other school districts have recognized Questa's sports facilities and the quality of craftsmanship, and are looking at the Questa Fields as a model for their own facilities.

"I'm very pleased to have received this national recognition for these facilities." said Nick Blea, LMC president. "I credit the quality of the installations to our entire LMC team in the field and in the office and their dedication to quality in all aspects of our operations."

LMC is a 38-year-old organization that designs and builds a variety of sports facilities, including tennis courts, basketball courts, playgrounds, running tracks, ball fields and more. It also provides maintenance; repairs and upkeep on facilities, and provides consultations for owners with questions relating to their sports facilities.
